Cyber Security is essential in protecting the data and integrity of all of the important assets connected to an organization.

CORE COMPETENCIES

Web and Mobile Application Penetration Testing to identify any potential security threats in a network infrastructure, and ensure the safety and functionality of our product.

Intrusion detection and prevention monitors network and system activities for malicious actions or policy violations, and prevents potential threats.

DevOps Pipeline to streamline the processes of software development, integration, testing, delivery, and deployment to ensure continuous integration and continuous delivery.

HOW WE DO IT

The methodology we use for Vulnerability Assessment & Penetration Testing **(VAPT)** revolves around standards like **OWASP** (Open Web Application Security Project) and **SANS**:

1. Planning and Preparation
2. Information Gathering and Analysis
3. Vulnerability Detection
4. Penetration Attempt
5. Analysis and Reporting
6. Cleaning Up

WHAT WE PROVIDE

Internal & External Vulnerability Assesment and Penetration Testing - We provide the following services:

WEB APP PENETRATION TESTING

Web application penetration testing helps organizations enhance their security posture.

MOBILE APP PENETRATION TESTING

The primary goal of this testing is to find and address security weaknesses before they can be exploited maliciously.

NETWORK PENETRATION TESTING

A methodical process used to identify, exploit, and remediate security vulnerabilities in a network infrastructure.
