WHAT WE PROVIDE

EMBEDDED SYSTEMS EXPERTISE

Deep and capable experience working in embedded technologies and projects, from C/C++/Rust and embedded systems and firmware.

HARDWARE DEBUGGING

Our hardware debugging expertise provides deep insights to pinpoint and resolve complex issues.

CODE QUALITY

An emphasis on code quality and procedures, incorporating CICD workflows and automated testing into your hardware needs.

EYE FOR SECURITY

Embedded solutions like IoT need engineers who code with a security mindset at all times.

HOW WE DO IT

Internal training ensures that all of our engineers are ready for low-level C projects.

Immersive learning ensures that our engineers have the knowledge they need before they join the project.

Communication skills to make the knowledge transfer between your engineers and our engineers happen so that we can quickly become independent contributors.

OPSec monthly training courses make sure that our developers are always thinking about security during their work.

Sprint velocity tracking ensures that we are delivering at the right pace.

Code review and testing ensure that bugs are caught before they make it to the product.
